

Letter of Registration and Return

May 2011

TO ALL SINGULAR as well as Nobles and Gentles and others to whom these presents shall Come, Sir L'Bet'e deAcmd,
Fleur-de-Lis Principal Herald and King of Arms of the Realm and Empire of Adria sendeth Greetings.

I apologize for the lateness of this LoRR. Submissions just kept tricking in and I wanted to get as many of them through for this LoRR. Eventually I had to stop, so there will be more for next month.

I must say that it has been a long time since I have seen such a diverse and creative group of submissions in one month. Not one violation of marshaling, the bordure wasn't used on the

majority of submission (a trend that has shown a lack of creativity). In this LoRR it seems the 50/50 tincture rule is being tested a lot. Out of 26 submissions, we have only two returns.

A final note to our heralds out there, mostly the new ones yet some of the older too. The LoRR is an official document. Not only does it record registered arms. It records rulings, research, and notification of events. The LoRR "is" the official means of communication. Not the Yahoo groups or websites. So whether you have submission or not, I suggest you read them all. They are not only informative, at times educational, they are necessary to be the best herald you can be.

In Service To the College of Arms and the Empire of Adria,

Sir L'Bet'e deAcmd
Fleur de Lis

**Lawrence Anthony**                         **Device**

Argent, a bear proper dormant upon a mount vert.

**Note:** a bear proper is brown which is equivalent to sable. Also a big huzzah to Epigonation Herald, I have been very reluctant with the period use of mounts more than a rarity. He actually did what I have been suggesting to many, get out of English and French heraldry. He found some great references in Italian Heraldry and cemented the use of mounts in our heraldry. Way to go.

Barry gules and Or, upon a chief Or a demi eagle with two heads issuant from chief base displayed sable.

**Note:** This was a bit tricky, the barry really does need to be evenly spaced, I had to envision such, otherwise there would be a tincture violation with the chief. This reminded me of a set of arms from the Manesse Codex, take a look;

Graf Otto von Botenlauben

# RETURNED

## ALBION

Ohannan, Estate of

Estate

Gule, a pale Or overall a bowen knot counterchanged.

*Improper practice; The confusion here is that this is a matter of layering charges and not a field division. You can not counterchange the bowens not in this type of application with the tincture of the pale which it is upon. With out the attempt to counterchange you would be left with a tincture violation. Suggestion: place the bowens knot besides the pale, perhaps add a additional one on the otherside.*

## BRANDENBURG

Otto Von Hammermakker

Device

*Per pale sable and gules, two ‘types?’ of hammers conjoined bendwise sinister Or.*

*Violations: First and for most, I am truly sorry to the presenter. The very fact that that this even reached me from the local level is very sad. For the past 12 years that I know of the college has never accepted colored pencil or crayon or any media but a form of ink. This rule has been in every manual and is currently on what is basically the second page. This very well could have been returned for that fact alone. A big Boo! To any herald who sends one of these in.*

*Second: Non period heraldic charge; these types of hammers I cannot find any reference for as a charge. The following are examples of period hammers found as charges;*

*Third, violation of VIII.G.!: Two different types of the same category of charge may not be used on the same piece of armory. This includes combinations such as: Sword/dagger/rapier. The two different types of hammers would fall under this rule.*
